| Nov | | 1.90 |
| Dec | | 3.05 |
| Total | 17.9 | 25.64 |

In answer to my own query on the last Chart 3, apparently the remnant "Dolly" brought the Rim Country no rain, but it hammered El Paso & Ruidoso, NM & spun off to the east. It's just as well, folks, because it could have created damage here as well. Besides, our July rainfall totalled 3.9", just above the Rim average. Hope we get some good moisture through August because it's been dry over the past 6 days. Prepared by Wes Suhr with data from my Pine Home Weather Station, HomeStationMonsoon2008.xls.
