Summary	70.8	93.6		54.1		3.13	21		SSW					

August monsoon rain was below average for both the Rim & Payson stations. AZMET (UA station at Green Valley Park) recorded a total of 1.75" for August compared to 1.36" at the Payson NWS station. Assuming near normal precipitation September through December, 2010 should exceed the average annual at Payson (Pine Home Station already exceeds the Rim average by 1.64").

Of course, Pete Aleshire is reporting gloom & doom from the results of some recent UA studies suggesting in his verbage, "bone dry springs, severe droughts, massive wildfires, violent storms" resulting from "accelerated climate change" (Payson Roundup, August 31, 2010). More about this nonsense later. [SamReport Aug2010. xls](#)
