"I'm hoping for a good storm in March," was my last comment on the Feb. water report. As you know, that did not happen, with a dry March yielding only 0.17" or 8% of normal for March (mean = 2.14"). Payson was also dry, with only 0.12" for March. So far for April (through April 13), Pine Home Station has recorded 0.57". March & April precipitation strongly effects the fire danger of our early fire season in May & June, the lowest precipitation months of the normal year. Note the high wind velocities in March. I'm hoping for another good storm this month.
